

Plate Electrodes

Carbon Plates

EM2360-001 & EM2361-001

Description:

Plates of carbon for experiments in electrolytes or for conductivity experiments.

Each plate is fitted with a simple screw terminal for the attachment of a wire.

EM2360-001	Length: 100mm	Width: 50mm	Thickness: 6mm
EM2361-001	Length: 100mm	Width: 25mm	Thickness: 6mm

Designed and manufactured in Australia
