

# Geoboard

## Student Model

**LB1866-001**

### Description:

The 'Geoboard' is used to study various geometric shapes and the relationships between areas and shapes.

The students create their own shapes and designs, learn counting, fractions and calculation of lengths and areas.

The Geoboard simplifies the understanding of the terms: 'centre', 'perimeter', 'symmetry' etc..

More advanced students can work with co-ordinates.

Rubber bands of different colours are stretched between pins to create squares, rectangles, triangles, parallelograms, polygons, circles, chords, segments, sectors, quadrants and other shapes.

Puzzles involving angles, lines and areas are set by the instructor and solved by the student.

### The Kit Consists Of:

- 1 pce. Geoboard.
- 1 pack Coloured rubber bands of various lengths.

Length: 180mm	Width: 180mm	Thickness: 20mm	Weight: 160g
